Download Brochure

FESC Bringing Energy Solutions to Florida,  
the Nation and the World

The Florida Energy Systems Consortium (FESC) was created by the Florida State government to promote collaboration among the energy experts at its 12 supported universities to share energy-related expertise. The consortium assists the state in the development and implementation of an environmentally compatible, sustainable, and efficient energy strategic plan. The Consortium was charged to *perform research and development on innovative energy systems that lead to alternative energy strategies, improved energy efficiencies, and expanded economic development for the state*. The legislature appropriated funding for research at five of the universities as well as support for education, outreach, and technology commercialization. The Consortium reports to and provides guidance on an as needed basis to the Florida Legislature, Executive Office of the Governor, and the Florida's Office of Energy housed in the Florida Department of Agriculture and Consumer Services.

Nibbler tested a sample of 5 pages from this website at 6:25 PM on Jul 14, 2018 (EDT).

Retest

Top priorities for website improvement

- Encourage sharing of your content with social media buttons on articles and pages of your website. The amount of social activity a website should have depends very much on the type of website, its target audience, and how long it has been in operation. [\(read more\)](#)
- Make sure that all the pages of this website include a meta description. If you don't include one, Google will choose a sample of text from the page to appear in the search engine result. By including a meta description, you can control how your search engine result will appear. [\(read more\)](#)
- Add meaningful anchor text that describes the link's destination. If the link contains an image, ensure you have provided alt text. [\(read more\)](#)

Facebook page0.0

[Help](#)

This website does not appear to be associated with a Facebook page.

- This website was found to link to a Facebook page, but it did not list this website in the information. This page might not belong to this site. Show recommendations

Source: [Facebook](#)

Twitter0.0

[Help](#)

This website does not appear to be associated with a Twitter account.

- This website was found to contain some links to Twitter, but none appear to be Twitter accounts associated with this website. Show recommendations

Popularity1.8

[Help](#)

3,137 Most popular website in the world

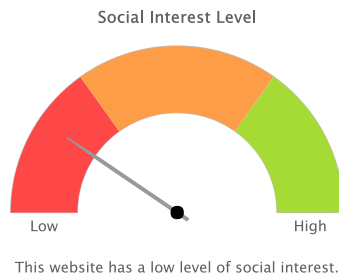

This website recently saw a moderate decrease in popularity.

- This is the 3,137 most popular website in the world.
- Over the past 3 months, this website has experienced a moderate decrease in popularity.
- This website accounts for none of the Internet traffic to ufl.edu and its subdomains.

Source: [Alexa](#)

## Social interest1.9

[Help](#)

1 likes

0 +1s

- We found 1 Facebook likes and 0 Google +1s for the 5 pages we tested. Close recommendations
  - Encourage sharing of your content with social media buttons on articles and pages of your website. The amount of social activity a website should have depends very much on the type of website, its target audience, and how long it has been in operation.

[Page breakdown](#)Sources: [Google+](#), [Facebook](#)

## Meta tags2.0

[Help](#)

- All pages include at least some metadata, but no pages have a description meta tag. The description meta data is important as it appears on Google's search result pages. Close recommendations
  - Make sure that all the pages of this website include a meta description. If you don't include one, Google will choose a sample of text from the page to appear in the search engine result. By including a meta description, you can control how your search engine result will appear.

### Pages with no meta description

[Meta Tags \(name attribute\)](#)[Meta Tags \(http-equiv attribute\)](#)

## Freshness3.0

[Help](#)

Last updated August 28, 2017

- It looks like this website was last updated on Monday, August 28, 2017. Visitors perceive up-to-date websites as more credible. Websites that are updated regularly are also spidered by search engines more often. Close recommendations
  - Consider updating this website regularly with new content.
- To find this information we used the last modified dates reported by this website's server in addition to looking for dates written on each page.

[All dates found](#)

## Internal links6.5

[Help](#)

- 23 links have no text describing their destination. Links on a page should describe their destination for the benefit of both screen readers and search engine spiders. Close recommendations
  - Add meaningful anchor text that describes the link's destination. If the link contains an image, ensure you have provided alt text.

### Empty link text

Server behavior7.0

[Help](#)

404 page

Compression

- This website handles missing pages correctly by sending a 404 HTTP status code.
- This website was not served using GZIP encoding. GZIP compression is widely supported and reduces the load time of a web page. Close recommendations
  - Enable GZIP compression on your web server or in your application.

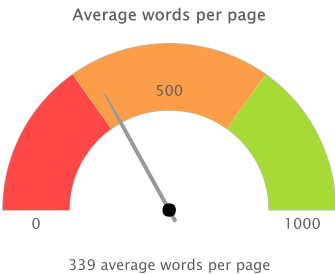

Pages without GZIP

<< first < prev 1 next > last >>  
[Page](#)  
[floridaenergy.ufl.edu/](#)  
[floridaenergy.ufl.edu/energy-research/](#)  
[floridaenergy.ufl.edu/energy-education/](#)  
[floridaenergy.ufl.edu/public-outreach/](#)  
[floridaenergy.ufl.edu/facilities-and-resources/](#)  
<< first < prev 1 next > last >>  

- This website follows the best practice of using a permanent (HTTP 301) redirect between URLs with/without trailing slashes. This is ideal.
- This test is not applicable as this website appears to be on a subdomain.

Amount of content8.0

[Help](#)

- This website has an average of 339 words per page. The amount of content on a website has been shown to correlate with its search engine ranking. Close recommendations
  - Consider the amount of text on this website and increase it if appropriate.

[Amount of content discovered](#)

Mobile8.6

[Help](#)

- All pages of this website appear to be optimized for viewing on a mobile phone (using CSS media queries) but it is not optimized for tablet viewing. It is important to make sure your content is optimized for a wide range of devices as a growing percentage of web browsing is done on phones and tablets. Close recommendations
  - Check how the website looks using a tablet and consider adding tablet-only styling using media queries. Some websites employ other techniques for mobile and tablet visitors which we cannot currently detect.

Device optimized pages

<< first < prev 1 next > last >>

Media specific CSS detected

Headings9.7

Help

areas bringing education energy facilities fact fesc florida funded institutions jobs nation outreach projects public research resources sheets solutions strategic thrusts user videos vision world

- All pages were found to use defined headings. This is excellent as it allows visitors and search engines to summarize the content of webpages quickly. Correctly defined headings aid accessibility and are particularly important for search engine optimization.
- Many headings (7.0%) were found to be empty, or incorrectly defined. Empty or invalid headings are of no value to search engines and make a website less accessible. Close recommendations
  - Make sure all headings have content which is relevant to the page of content.

Page headings detail

Images9.9

Help

7% of images have a clearly defined size

6 images are being resized by the browser

- Most images (93.0%) don't have defined sizes using width and height attributes in the HTML. These attributes are optional, but strongly recommended as they help the browser arrange the page faster. Close recommendations
  - Add width and height attributes to all image tags. The width and height you specify should be the same as the source image. If you want to resize an image in the browser, use CSS.

Non Explicitly Sized Images
