This tab shows accessibility issues, indicating problems for older users, people with disabilities or accessibility needs. Automated testing cannot detect all accessibility issues, so should be used alongside human testing.

Level	WCAG 2	Section 508 - 2017	Key
A	🔴	🔴	🔴 Pages with level A issues are unusable for some people
AA	🟠	🟠	🟠 Pages with level AA issues are very difficult to use
AAA			🟠 Pages with level AAA issues can be difficult to use

Prior Description and URL	Guideline and Line#	Count

Level A

8 issues on 6 pages

🔴 ALT text should not contain placeholders like 'picture' or 'spacer'.

                                          WCAG 2.0 A F30   2 pages
                                            Section 508 (2017) A F30

For purely decorative images and spacers use ALT="", for images of text use the text, and for other images use a description of the image.

Impact on users:

- JAWS : Reads out placeholder text, instead of a useful image description.
- NVDA : Reads out placeholder text, instead of a useful image description.
- SaToGo : Reads out placeholder text, instead of a useful image description.
- WindowEyes : Reads out placeholder text, instead of a useful image description.
- VoiceOver : Reads out placeholder text, instead of a useful image description.

ALT text: 3icon_linkedin   Line 599
http://floridaenergy.ufl.edu/

ALT text: image00111   Line 514
http://floridaenergy.ufl.edu/energy-education/

🔴 Each A element must contain text or an IMG with an ALT attribute.

                                            WCAG 2.0 A F89   6 pages
                                            Section 508 (2017) A F89

Add text to the link, or ALT text if the link contains an image. If there is no link text or the ALT text is blank, screen readers have nothing to read, so read out the URL instead.

	This issue was found on another 2 pages. The trial version is limited to showing issues on 4 pages.		
🔴	Identify row and column headers in data tables using TH elements, and mark layout tables with role='presentation'. Data tables allow screen reader users to understand column and row relationships. Layout tables read cells as a series of unrelated paragraphs with no tabular structure. Without TH or ROLE, screen readers apply heuristics to decide whether a table is a layout table or data table. These heuristics vary greatly between screen readers, and are affected by browser being used, window size, and font size (so the outcome is very unpredictable without TH or ROLE). If a data table has headers marked up using TD, then change these to TH. If a data table has no headers, add TH elements describing each row and/or column. If the table is only used for layout add role='presentation' to the TABLE element. Impact on users: • JAWS Reading: Treats tables without TH and ROLE as layout tables if the table contains cells above or below certain pixel sizes. This measurement is affected by browser window size, browser font size, and the browser used. • NVDA Reading: Applies a 'layout table' heuristic to tables without TH and ROLE which varies depending on the browser used and on the window size in some circumstances. • VoiceOver Safari OSX 10.9 Reading: Uses a sophisticated heuristic on tables without TH and ROLE, which is similar (but not identical) to the heuristic used by NVDA with Firefox. 🔴 No TITLE attributes found for the frames on these pages. | WCAG 2.0 A 2.4.1
Section 508 (2017) A 2.4.1 | 1 pages

Add a TITLE attribute to each FRAME and IFRAME element (e.g. TITLE="Main Content"). Without a TITLE some screen readers read out the FRAME filename, which is usually meaningless.

IFRAMEs with no title cause problems in:

- JAWS 14 and 15 with Firefox (the frame SRC filename is read instead)
- VoiceOver on OSX 10.9 (a meaningless title like "Frame twelve" is read out)

| http://floridaenergy.ufl.edu/ | Line 545 | |

🔴 This form control has no LABEL and no programmatically determined name. | WCAG 2.0 A F68
Section 508 (2017) A F68 | 1 pages

Prior Description and URL	Guideline and Line#	Count

A programmatically determined name allows screen readers to tell the user what the control does. To add a name do one of the following:

- Use a LABEL element with the FOR attribute set to the ID of the form control
- Wrap a LABEL element around the form control
- Add a TITLE attribute
- Add an ARIA-LABELLEDBY attribute (not supported in all screen readers)
- Add an ARIA-LABEL attribute (not supported in all screen readers)

http://floridaenergy.ufl.edu/　　　　　　Line 298 613

🔴 This page has markup errors, causing screen readers to miss content.　　　WCAG 2.0 A F70　　4 pages
Section 508 (2017) A F70

Fix the errors listed on the Standards tab of this report. Markup errors like missing end tags mean screen readers may skip important content.
